OVEN DX DISPLAYS EXPLAINED

Gourmet White LED Screen Programmer

Epicurien Screen Programmer

Connaisseur Screen Programmer

After selecting a preprogrammed function or dish, a clear and crisp on-screen display recommends what shelf to place the dish in the oven and the best temperature to use and guides you through the programmed cooking process.

Like the Connaisseur Programmer, it uses the same access system where you can navigate through submenus and different types of dishes using the dial provided. Each available function and recipe is depicted on screen using delicate sketches.

This interface is home to a simple and intuitive high-definition colour screen which lets you navigate through sectors and submenus. Photos are displayed on the screen when exploring the endless preset dishes and recipes.
